Synectics' unparalleled ability to deploy custom digital surveillance solutions that integrate with existing legacy systems and future technologies has established them as a market leader in the Middle East, UK, Europe and North America. For more information about Synectics, visit www.synx.com

Synectic Defence Systems gear up for DVD 2010

Tewkesbury, UK– 22nd, June, 2010 – Synectic Defence Systems (Synectics) the specialist Defence division of Synectic Systems Group Ltd today announces that after successfully showcasing its new, cutting-edge Chili ESM system at the EW show in Berlin 11th - 12th May 2010, the division is preparing for one of the industry's most prestigious shows of the year and what is promising to be an exciting exhibition for the division.

DVD 2010 which takes place from June 23rd - 24th at Millbrook, Bedfordshire, is attended by highly influential members of the Defence community, including, amongst others, Senior Military personnel. Managing Director of Synectic Defence Systems, Graham Jones describes the importance of this pivotal event to the division "Thanks to the many changes that the division has undergone in recent months, we are really excited to be showcasing three fantastic products at DVD 2010. To us, like many others in the industry, the DVD show is the most important event on our calendar and we are very pleased to be presenting so many of our products this year to the important decision makers which attend the show. With the recent promise by the Prime Minister to devote more government money towards tackling the threat of IEDs, we are expecting a great deal of interest in our systems at the event"

Synectic Defence System will be presenting three of their key products at the event;

insight360

Insight360 is the world's first blast resistant recorder. Capturing video, audio, position and 3-axis shock data, it has been designed to be the fighting vehicle's Black Box. The device connects to cameras and observation systems, giving 360° situational awareness, and recording all footage and data.

Chili

Partnered with Persides, Synectics Defence Systems brings you the next generation of Body Worn ESM equipment – codename Chili - the world's smallest, full-featured ESM solution. With size, weight & power ever critical on the warfighter, the Chili system is light weight and low volume, offering threat warning, full spectral surveillance and direction finding on the moving soldier. The system presents the Defence community with a crucial ally in today's modern battlefield.

LRS Cameras

The LRS is a family of systems for long-range reconnaissance, homeland security, border protection, coastal surveillance, military tracking and counter insurgency, which can be deployed with integrated long-range thermal cameras to provide total day and night surveillance. Employing the very latest in Electro-optic technologies, the LRS camera range provides surveillance at extreme ranges - providing 24-hour capability in long-range observation and the detection and identification of vehicles and personnel.

The division will also be featuring these and other products at Transport Security Expo 2010 and Future Armoured Vehicle Exhibitions later on in the year.
